PROFESSIONAL EXPERIENCE

Full-Stack Development Freelancing / Gig jobs

Multiple Firms and Volunteering Vancouver, BC | 07/2025 – 03/2026

- Designed, developed, and maintained full-stack applications (frontend, backend, databases) while eliciting and translating business requirements into scalable technical solutions.
- Built responsive UIs, developed backend services/APIs, and ensured seamless end-to-end system integration.
- Collaborated with stakeholders in Agile/Scrum environments, contributing to sprint planning, user stories, and acceptance criteria.
- Led and supported SIT and UAT phases, working closely with QA and business users to validate functionality, resolve defects, and ensure alignment with business requirements.
- Reviewed technical and functional documentation, ensuring traceability between requirements, design, and implementation.
- Supported the full SDLC including testing, debugging, and performance optimization, driving continuous improvements in system efficiency and user experience.

Business Solutions Analyst

Uni. Canada West: Digital Transformation (ERP/ CRM/ AI Automation) Vancouver, BC | 09/2023 – 06/2025

- Led strategic analysis and designed AI/ML-enabled workflows (predictive risk scoring, automated document processing, student-service case automation) and improved auto-processing speed
- Executed the full requirements engineering lifecycle - user stories, acceptance criteria, use cases, FSD, SRS, RTM - across ERP (Records, finance, HR), CRM, Jira, Trello, and Confluence for management.
- Conducted JAD sessions, stakeholder interviews, design workshops, mock-ups, and prototyping to drive system modernization and validate business, functional, and UX requirements with BABOK.
- Analyzed financial (tuition billing, refunds, AR), academic, compliance (audit, FERPA policies), student-service workflows, and documented AS-IS/TO-BE models using UML and BPMN 2.0.
- Coordinated API integration analysis for REST/SOAP services, including OAuth, API keys, payload mapping, OpenAPI/Swagger review, and error-handling logic to ensure seamless communication.
- Led SIT, UAT, regression testing, user-story validation, and defect triage, improving release quality, accelerating deployment cycles, and using the SAP S/4HANA ERP system.
- Built Power BI dashboards (DAX/RLS), ETL STTM documentation, and SQL reports to improve operational transparency, regulatory compliance, and executive decision-making.
- Supported IAM, RBAC, OAuth, and data-governance alignment for university cloud systems.

AI Business Solutions Analyst & Project Coordinator (FinTech/ERP/Compliance - Enterprise Exposure)

Xomic Infotech Pvt. Ltd. (FinTech SaaS Platform) Ahmedabad, India | 08/2022 – 08/2023

- Delivered comprehensive requirements for FinTech platforms, encompassing payment systems analysis (e.g., transaction processing and fraud detection), AML/KYC compliance checks, PCI DSS security standards, SOX financial reporting, GDPR data protection, and risk-mitigation strategies.

- Defined and documented user stories - BRD to SRS, and wrote functional, non-functional, integration, and data requirements for ERP, CRM solutions, Jira, Trello, and Confluence for management.
- Conducted in-depth financial system analysis, process mapping, and workflow re-engineering, resulting in reduced operational costs by optimizing resource allocation and improved throughput.
- Performed detailed API analysis and integration mapping for payment gateways (e.g., Stripe, PayPal), AI engines, ERP modules, and CRM systems to enable seamless data flow and interoperability.
- Built ETL specifications, developed SQL scripts for data transformation, created metadata documentation, and designed KPI dashboards using tools like Tableau for enhanced BI and reporting.
- Managed SDLC Agile ceremonies, including daily stand-ups and retrospectives, ensured release readiness, facilitated sprint planning, and prioritized backlogs to accelerate project delivery timelines.
- Coordinated enterprise-wide system audits, conducted data-privacy reviews under frameworks like GDPR, and collaborated with InfoSec teams on vulnerability assessments to fortify security postures.

AI Business Solutions Analyst (Agile BSA / Product Owner Proxy) & Client Success Manager

Floatbot.ai (FinTech & InsureTech SaaS Platform based on AI NLP) Bengaluru, India (USA) | 08/2020 – 08/2022

- Led end-to-end AI/ML lifecycle for conversational AI chatbots, NLP-based sentiment analysis, fraud detection algorithms, claims automation systems, and intelligent document processing tools tailored to FinTech and InsureTech clients, resulting in enhanced operational efficiency and reduced fraud.
- Defined key AI model performance metrics, optimized accuracy through iterative tuning, minimized model drift via monitoring, and ensured alignment with Responsible AI principles, including bias mitigation and ethical guidelines by adhering to ISO 27001 compliance, SFTR, and CIRO.
- Developed data-driven business cases for AI implementations, process automation, CRM system upgrades, and enterprise-wide projects, strategic decision-making, and resource allocation.
- Led hypercare support during go-live, managed operational handovers to production teams, and reduced post-production incidents by 30% through QA strategies, including testing and defect tracking.
- Calculated ROI for initiatives, supported funding approvals from stakeholders, and tracked benefit realization, contributing to multimillion-dollar project greenlights and measurable cost savings.
- Designed intuitive customer-facing web portals and internal CRM enhancements, boosting user adoption by 40% and improving system throughput for faster transaction processing.
- Authored FSD, SRS, and RTM; facilitated System Integration Testing (SIT), UAT, and regression testing; and led cross-functional collaboration among Product, Jira, Trello, and Confluence for management.
- Created interactive Power BI and Tableau dashboards, established KPI frameworks for performance tracking, built forecasting models using statistical methods (SAP S4/HANA ERP), and generated compliance monitoring reports to support regulatory adherence and data-informed insights.
- Managed SDLC Agile delivery processes, prioritized product backlogs, refined user stories for clarity and feasibility, and drove sprint outcomes, resulting in on-time releases and improved team velocity.

Business Analyst

CRB Tech Solutions Pvt. Ltd. Pune, India | 11/2019 – 08/2020

- Supported BA duties, including requirements gathering, process mapping, and test case creation.
- Executed SIT/UAT, defect triage, API testing (REST/SOAP), and documentation reviews.
- Gained foundational exposure in ERP, CRM, Web Apps, SQL, ETL, and quality engineering practices.

Business Analyst (FL State Government — Licensing & Regulatory Systems)

Kyra Solutions, Inc. Ahmedabad, India (USA) | 06/2018 – 11/2019

- Led government service transformation initiatives involving licensing and compliance systems.

- Elicited requirements via JAD workshops, stakeholder interviews, and business case development.
- Prepared process flows, UML diagrams, BPMN, system specifications, and integration requirements.
- Coordinated testing cycles, RTM creation, UAT support, and release documentation.

Jr. Business Analyst (Recruitment Technology & HR Systems)

IMS People Pvt. Ltd. Ahmedabad, India (UK) | 07/2016 – 06/2018

- Collected and documented requirements for RPO, CRM functionality, and reporting dashboards.
- Built SQL reports, data extracts, and process documentation supporting HR analytics and automation.
- Conducted UAT, defect management, and stakeholder communication.

EDUCATION

- **MBA, Business Analytics — University Canada West (06/2025)**
- **B.E., Electrical Engineering — Gujarat Technological University (2016)**
